

Accessible DnD Character Sheets for Disabled Players

April 8, 2024

Are you or someone you know a Dungeons & Dragons player with print or reading disabilities? We're excited to announce a new resource designed to enhance accessibility and inclusivity in tabletop gaming.

We understand the importance of accommodating diverse needs within our gaming communities. That's why we've developed a set of character sheets tailored specifically for players who have difficulty with traditional text-based materials.

They should be fighting monsters, not their character sheet!

Our Accessible Character Sheets utilize [emojis] alongside text to help players navigate character information efficiently. Whether it's tracking [Abilities], [Spells], or [Possessions], the intuitive layout makes it easy to find what you need at a glance. Plus, with blank spaces for personalized drawings, players can create visual cues that resonate with them, enhancing memory and engagement.

Key Features:

- [emojis] Emoji-based design for easy navigation []

- Blank spaces for personalized drawings
- Images of dice shapes for quick reference
- Available in PDF and DOCX formats for flexibility and customization
- Screen reader-friendly DOCX option for enhanced accessibility

We're committed to promoting diversity and inclusion in gaming, and these character sheets are just one way we're working to make TTRPGs more accessible to everyone. Best of all, they're offered under a CC-BY-4.0 license, so you can share and adapt them to suit your gaming group's needs and share your creations.

Join us in fostering a more inclusive gaming community. Download our Accessible Character Sheets today so everyone can explore together!
