

Appendix 2: Complications

August 3, 2022

Some traits of disabilities or illnesses can lead to additional conditions that may be temporary, degenerative or lead to an entirely new set of traits. These complications may be a result of any number of internal or external factors, and depending on the cause, may be healed with applicable healing magic or medicine. If the complication does not indicate a frequency, use the causal trait's frequency or, lacking a causal trait, choose or roll on the [Frequency Table](#).
