

Rose Gold Dragon: Draconic Omnibus, Vol. 1

October 21, 2020

Rose Gold Dragons are known for their love of children. Stories abound of children lost in the wilderness or at sea who are rescued by a rose gold dragon or some other creature of a similar hue.

At the same time, these stories have sometimes grown darker, with suspicion that questions the motivations of these creatures, and anytime a child goes missing in the vicinity of a rose gold dragon lair, the dragon becomes the primary suspect.

How well do you really know the dragons? Sure, you've memorized their stat block, but these are intelligent complex beings who affect the world and your characters so much more than a big lizard in a cave! Welcome to the [Draconic Omnibus](#), a multi-volume set detailing the canon 5e dragons and some new varieties to round out the set.

Arcane Tradition: Biomancer (5e)

October 21, 2020

Like a little mad science in your fantasy? What if Dr. Frankenstein or Dr. Moreau could manipulate the Weave? Where do the hybrid creatures and characters come from in your game? Introducing: the Biomancer.

[Download from DriveThruRPG](#)

Biomancers have learned to use the Weave to manipulate life itself, accessing a form of magic unavailable to most wizards. While other wizards can use Biomancy spells, they lose their proficiency bonus due to the strangeness of the magic.

This supplement includes **4 subclasses**, **11 new spells**, and **3 new backgrounds**.

Some consider biomancy unnatural, but it's the biomancers of Tanmaa who are responsible for many of the hybrid and augmented creatures who fill the Western Division of Caphora, and while biomancers have been blamed for some of the plagues that have struck the continent, they're the first to be called when plague strikes to control it.

Most biomancers are found in the labs of Tanmaa, but some nobles hire them as extremely expensive personal physicians. Some

biomancers are the products of their own labs who have learned, through observation and sometimes deliberate training, to use the very magic that created them.

Biomancers specialize in one of four forms of the craft: **Somaturgy**, **Neuroturgy**, **Amalgamism**, and **Miasmism**. They can use other biomancy spells but prefer their own tradition.

Other Campaign Worlds

While the Biomancer was developed specifically for the Caphora campaign setting, which you can download **free** from our website, it will work with most existing campaign worlds, especially those with a slight “mad science” or steampunk element, gnomes who like to tinker, or campaign worlds with hybrid creatures or characters.

Arcane Tradition: Nullimancy (5e)

October 21, 2020

[Download now at DriveThruRPG](#)

Nullimancers have learned the secret art of tapping into and

manipulating the all-consuming energy of Oblivion. They can generate it and transform it to a variety of effects, all of which destroy matter or energy in some way. This results in new spells and features, and several existing spells have Nullimancy versions that use Oblivion instead of the Weave.

The Nullimancer is a Wizard Arcane Tradition using an entirely new form of magic from the Caphora campaign world, but it can also be used in other settings.

This product contains the **full subclass, 14 new spells, and a new magic item**, all based on nullimancy magic.

All play content is also available in the D&D Beyond Homebrew section so you can easily add it to your campaign in [Subclasses](#), [Spells](#), and [Magic Items](#).

Random Fantasy City Magical Feature Generator

October 21, 2020

Wanting to add magical elements to the cities to my high fantasy Dungeons & Dragons campaign, since it's difficult to just think of elements out of the blue, I came up with this list as an idea

generator. Here's how it works:

1. Choose how many features to include. This will be determined by the level of magic in your world. For my high fantasy world, you can use the Number of Features formula below.
2. Roll D100 on the Feature Type table. That will tell you which table of features to roll on.
3. Roll on the corresponding Feature table (Natural, Man-made, or Supernatural)
4. Then, roll D100 on the Phenomenon table to determine the type of phenomenon.
5. If it tells you to roll again, combining, roll on the same table unless otherwise instructed, and figure out how to combine the two items.
6. Use your imagination to combine feature & phenomenon to determine what fits best in your campaign world. Don't forget the history of the feature and how it has affected the city and its residents.

Number of Features

For every 1000 people in a city, roll 1D6. Every 6 indicates one magical feature. (This can also be used for rural regions, but I suggest 1D6 for every 3000-5000, but note that the feature may be hidden and unknown to the populace, and the party could travel through the region and never know it's there.)

Feature Type (D100)

01-35 Natural

36-80 Man-Made

81-95 Supernatural

96-00 Roll twice, combining
