Random Fantasy City Magical Feature Generator

May 31, 2020

Wanting to add magical elements to the cities to my high fantasy Dungeons & Dragons campaign, since it's difficult to just think of elements out of the blue, I came up with this list as an idea generator. Here's how it works:

- 1. Choose how many features to include. This will be determined by the level of magic in your world. For my high fantasy world, you can use the Number of Features formula below.
- 2. Roll D100 on the Feature Type table. That will tell you which table of features to roll on.
- 3. Roll on the corresponding Feature table (Natural, Manmade, or Supernatural)
- 4. Then, roll D100 on the Phenomenon table to determine the type of phenomenon.
- 5. If it tells you to roll again, combining, roll on the same table unless otherwise instructed, and figure out how to combine the two items.
- 6. Use your imagination to combine feature & phenomenon to determine what fits best in your campaign world. Don't forget the history of the feature and how it has affected the city and its residents.

Number of Features

For every 1000 people in a city, roll 1D6. Every 6 indicates one magical feature. (This can also be used for rural regions, but I suggest 1D6 for every 3000-5000, but note that the feature may be hidden and unknown to the populace, and the party could travel through the region and never know it's there.)

Feature Type (D100)
