

Shani's Equalizer

November 18, 2022

Potion, common

This gray grainy potion will remove 1d6 days from the beginning of an [Emotion Fluctuation](#) episode, but at the end of the duration, the fluctuation still happens.

Isadora's Mood Stone Bracelet

November 18, 2022

Wondrous Item, common

This narrow cuff bracelet has an inset quartz crystal that responds to Emotional Fluctuation by gradually changing color between blue and red to reflect and predict the associated emotion between enjoyable and painful emotions. The color changes based on the associated emotional cycle, not situational emotions, and the color shift precedes the emotional shift by a day, so monitoring it closely will give you a sense of when to expect shifts to change.
