

# Tumor

July 8, 2022

You have a noticeable tumor or growth on your face with a radius of  $(IE \times 1 \text{ inch})$ . This growth may match your skin color or be red, dark brown, or a different color caused by magic. Consequently, when people who don't know you see you, they usually only see your face. This gives you  $+(IE)$  to Dexterity (Sleight of Hand) checks but  $-(IE)$  (up to  $-4$ ) to disguise checks or Dexterity (Stealth) checks to blend into a crowd as well as a  $-(IE)$  penalty on Charisma (Persuasion) checks due to many people's discomfort around those with unexpected appearances. Note that this is usually a permanent condition and does not fluctuate, but the player and GM are welcome to determine a magical version that fluctuates based on the Frequency Table above.

## Real-world Examples

Cystic Hygroma, Fibrous Dysplasia, Dermoid Cysts, Hemangiomas, Neurofibromatosis

## Assistive Options

Surgery ( $IE \times 50 \text{ gp}$ ) can reduce the IE by 2, requiring a successful DC  $(IE) + 10$  Wisdom (Medicine) check. Reducing the IE to 0 will still leave a noticeable scar, giving a  $-1$  to any charisma checks related to physical attractiveness.
