

Nail Difference

August 3, 2022

Your nails have a shape (30%) or color (70%) not typical for your ancestry. Shape differences can include thickness, irregular thickness, clubbing, or spooning. If you have claws as natural weapons, the damage they cause is reduced by (IE). If discolored, while most commonly yellow or black, your nails can be any color. This gives a -(IE) penalty on all Dexterity (Sleight of Hand) checks.

Real-world Examples

Beau's Lines, Clubbing, Koilonychia, Leukonychia, Mees' Lines, Onycholysis, Terry's Nails, Yellow Nail Syndrome

Assistive Options

You can paint your nails or wear gloves to cover your irregularities as long as you're in an environment where that's appropriate.

Magical Assistance

Magic that alters your appearance can also change the appearance of your fingernails.
