

# Atraitatic Disease Carrier

August 3, 2022

You are infected with a disease but show no symptoms yourself. Choose a disease from official fifth edition sources or [another source](#). You transmit this disease to others via the transmission method associated with it. Anyone who comes into contact with you via its transmission method must succeed on a DC 8 + (IE) Constitution saving throw or become infected.

## Real-world Examples

Typhoid Fever, HIV, Epstein-Barr Virus, Clostridioides Difficile, Cholera, Chlamydia, Poliomyelitis, Tuberculosis, COVID-19

## Assistive Options

Depending on the method of transmission, taking precautions (e.g., a face mask for air transmission) can give the potential target advantage on the Constitution saving throw.

## Magical Assistance

Magic that cures diseases can eliminate this condition, but anytime you need to make a saving throw against disease, unless you succeed by at least 5, you become an Atraitatic Disease Carrier of the new disease.
